LEADERSHIP & PROFESSIONAL EXPERIENCE

Student Councilor – Faculty of Engineering in Foreign Languages (FILS)

March 2026 – Present

- Actively represent 1,500+ students in high-level governance meetings, negotiating administrative decisions and aligning student needs with university strategic objectives.
- Analyze student feedback to identify academic pain points, proposing data-driven curriculum improvements and evaluating the impact of new university policies.

External Relations Member – RoboForgers Robotics Club

October 2025 – Present

- Developed the team's communication strategy and core motto, ensuring consistent brand positioning across all channels.
- Delivered compelling pitches at Robofest to engage the public and translate complex technical concepts into accessible messaging.

Event Organizer – Poli International Fest

May 2026

- Directed end-to-end logistics and cross-functional teams for the Hardcore Entrepreneur grand final, troubleshooting bottlenecks to deliver a flawless stakeholder experience.

HSSIP-RO Intern – CERN, Geneva (European Organization for Nuclear Research)

June 2024

- Conducted a comprehensive comparative study evaluating the technological and operational impact of next-generation particle accelerators against current infrastructures (ATLAS, CMS).
- Synthesized macro-scale technical data into a structured feasibility report, pitching strategic insights to a highly specialized international audience of CERN researchers.
- Analyzed large-scale system architectures in advanced workshops, assessing how emerging technologies integrate into enterprise-scale operations.

PROJECTS

CortexBoard – Productivity Web Application | *Figma, UI/UX Design, HTML/CSS*

In Progress

- Managing the complete end-to-end product lifecycle of a productivity web application, from initial conceptualization and UX strategy to technical deployment.
- Designed Figma prototypes focused on behavioral optimization, translating user-centric requirements into actionable technical specifications.
- Executing the Minimum Viable Product (MVP) by engineering the frontend (HTML/CSS) and structuring the backend database logic for dynamic data integration.

UNISCHED – AI-Driven Scheduling Platform | *Tailwind CSS, HTML, JavaScript*

May 2026

- Led the product strategy for an AI-driven scheduling platform, successfully pitching the end-to-end narrative to secure an Honorable Mention at a scientific communications session.
- Bridged the gap between user requirements and technical execution by designing the frontend architecture and its integration with a Python AI backend.
- Defined user flows and developed an intuitive, mobile-first dashboard to resolve complex timetable overlaps for university stakeholders.

EDUCATION

POLYTECHNIC UNIVERSITY OF BUCHAREST

Graduation: June 2029

Bachelor of Science in Computers and Information Technology at the Faculty of Engineering in Foreign Languages (FILS) – French Stream

- Relevant Subjects:** Microeconomics, Macroeconomics, Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Linux & Operating Systems, Web Development.

CERTIFICATIONS AND AWARDS

Honorable Mention at the Student Scientific Communications Session, FILS – Recognized for the design and presentation of the UNISCHED platform, 2026

Project Management Ready – Project Management Institute (PMI), 2026

Web Programming 101 – Cisco Networking Academy, 2025

SKILLS

- Tools & Platforms:** Jira, Confluence, Trello, Notion, GitHub, Git, Excel, Figma
- Soft Skills:** Creativity, Critical Thinking, Problem Solving, Adaptability, Negotiation
- Technical skills:** Python, Django, Java, C, C++, Linux, HTML, CSS, Tailwind CSS, JavaScript
- Spoken languages:** Romanian (Native), English (C2), French (B2-C1), Spanish (A2)
